Emirates Projects: What other USPs does Vision Control® offer?
Jean-François Couturier: Particularly popular with clients is the Vision Control® privacy option for both interior and exterior healthcare glazing applications. In advanced louvered glazing technology does away with strings, ensures alignment, and requires no maintenance. It also provides the perfect privacy solution for facilities such as ICUs, operating rooms, and nurseries. In fact, hundreds of hospitals around the world trust Vision Control®, not only for total privacy, but also optimal hygiene, tranquility, and HEPA compliance, ensuring that it meets Health Insurance Portability and Accountability Act (HIPAA) requirements for doctor’s office privacy and confidentiality.

Emirates Projects: Vision Control® has been recognised by its peers too, picking up a couple of prestigious awards.
Jean-François Couturier: Yes, we’re delighted that Vision Control® won The Architects’ Choice Award from the National Symposium on Healthcare Design, as well as a Product Innovation Award from Architectural Products Magazine.

Emirates Projects: Tell us about other products offered by Unicel Architectural.
Jean-François Couturier: We specialise in large, customised skylight projects, with our patented louvered technology, unique framing systems for the most discerning architectural requirements. Unicel’s skylight systems are renowned for an intersection to accommodate gutter continuity and thermal expansion. Unicel skylights can also have added special features such as integrated Vision Control® glazed panels that enable the control of light and heat into the building.

We offer a range of solar shading solutions, or sun-blinds, too, which provide an optimum daylight control. These fixed or motorised louvers are made of maximum strength extruded aluminium profiles, designed ensuring better control of solar heat gain and daylight performance, while adding a versatile aesthetic appeal to a building’s design. Unicel’s solar shading systems are celebrated for their precision, quality assembly, cost-effectiveness and exceptional construction. They can be installed in fixed or variable positions for adjustable shading to ensure maximum comfort and energy efficiency. They provide an attractive architectural envelope for a wide variety of construction challenges – in atrium skylights, walkways, welcome galleries and office environments. They can be installed in fixed or variable positions for adjustable shading to ensure maximum comfort and energy efficiency.

Jean-François Couturier: We specialise in the largest medical centres in the Middle East, and have expanded our target markets?

Jean-François Couturier: Emirates Projects: How do you see the company evolving over the next five years?
Jean-François Couturier: We will continue to innovate, providing state-of-the-art solutions for discerning clients who refuse to compromise on either quality workmanship or value-for-money. Moreover, we see continued growth in the Middle East, one of the world’s most dynamic and fastest moving markets. At Unicel Architectural, we are genuinely excited about the future and the opportunities that will arise in the years ahead.
