

## Unicel Wins Architectural Record Magazine's 2014 RECORD PRODUCTS Award for Vision Control® Integrated Louvers

**MONTREAL, Canada – January 13, 2015** – Unicel Architectural today announced that it has been recognized for an Architectural Record Magazine's 2014 RECORD PRODUCTS award in the "Openings: Windows/Doors/Hardware/Daylighting Tools" category for its Vision Control® louvered glazing product. The RECORD PRODUCTS awards honor the best new building products on the market as selected by a jury of architects, designers and product specialists.

"We are so proud of this achievement! The RECORD PRODUCTS awards are known to single out the best in the industry," said Jean-François Couturier, CEO of Unicel Architectural. "We work continuously to perfect our Vision Control® solution to exceed industry standards for quality, design and functionality. We dedicate this award to the entire Unicel team for their ongoing efforts in delivering a world-class product."

RECORD PRODUCTS, Architectural Record's annual awards competition, drew more than 500 entries ranging from building materials to finishes and furnishings. A panel of judges from leading architecture and design firms who specialize in products and specification, judged the products on rating criteria ranging from innovation to aesthetics. Winners were published in the December 2014 issue of Architectural Record Magazine.

Vision Control® is a hermetically sealed system that combines louvers within glass, and adapts for any interior or exterior glazing application. The latest version features fire-rated trims, faster operation capabilities, Argon gas to improve thermal performance, and a curtain wall adapter to eliminate the need for on-site modifications.
