

# VISION WHEN NEEDED PRIVACY WHEN REQUIRED

Insulating glass unit with integral cord-free louvers

*Insulating Glass Unit with Integral Cord-free Louvers*

Vision Control® is a unique patented sealed glass unit with operable louvers that provides a wide array of solutions to heat, light and sound control, for utmost hygiene, privacy and security.

Vision Control® eliminates strings and minimizes maintenance efforts, while offering great comfort and significant energy savings.

Now available in a reduced thickness. Vision Control® Mini, with a 1" airspace is specially created for sliding doors and is also perfectly suited for retrofit applications in windows with glass pocket depths as narrow as 1 1/4" thick.

Vision Control® can be installed in: doors, sidelights, windows, partitions, skylights and curtain walls.
